Dennis Schröter:

We have been testing here a few times recently, but I was shocked after one lap in practice. With all those artificial bumps just before the corners the track had lost its nice flow completely and I was really struggling. Practice was so-so, and then I tried to push too hard in my first race, which resulted in massive arm-pump after 15 minutes. I had to slow down and lost a few positions. 2nd race was much better, I had a good pace and only lost my 5th place due to a stupid little mistake towards the end.

Lars Oldekamp:

I also didn't like what they had done to the track, but I didn't let it bother me. I rode a good qualification and had a good start in the first race. Unfortunately I was taken down in the first corner and was second to last when I restarted. I pushed hard and steadily worked my way back up to 8th. After another good start in the second moto I rode well, even though my leg which was badly bruised from the crash in moto 1 hurt quite badly. My biggest problem was the lapped riders though, one of those incidents with a lapper allowed Brakke to pass me on the last lap.
